Courts, regulatory tribunals, and international bodies are often seen as a last line of defense for environmental protection. Governmental bodies at the national and provincial level enact and enforce environmental law, and their decisions and actions are the focus of public attention and debate. Court and tribunal decisions may have significant effects on environmental outcomes or corporate practices, and raise questions of how they may best be effectively and efficiently enforced on an ongoing basis.

Environment in the Courtroom II examines major contemporary environmental issues from an environmental law and policy perspective. Expanding and building upon the concepts explored in *Environment in the Courtroom*, it focuses on issues that have, or potentially could be, the subject of judicial and regulatory tribunal processes and decisions. This comprehensive work brings together leading environmental law and policy specialists to address the protection of the marine environment, issues in Canadian wildlife protection, and the enforcement of greenhouse gas emissions regulation.

ALASTAIR R. LUCAS, K.C. is a Professor Emeritus and Senior Research Fellow at the Canadian Institute of Resource Law, University of Calgary. He has served as an Acting Member of Alberta's Energy Resources Conservation Board, as a Policy Advisor at Environment Canada, and as counsel to the Nunavut Water Board and Alberta Environmental Appeals Board.

ALLAN E. INGELSON is a Professor in the Faculty of Law, University of Calgary, and Executive Director of the Canadian Institute of Resources Law. His research focuses on Canadian and international energy, mining and environmental issues.
